Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-5,8,16,19,28 and 46-49 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/30/2007 has been entered.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3-5, 8, 16, 19, 28 and 46-49 are rejected under 35 U.S.C. 101 because they are drawn to non-statutory subject matter. In claim 1, lines 1-2, applicant positively recites part of a human, i.e. "a modified knee joint within a mammalian body". In claim 1, lines 2-3, applicant positively recites part of a human, i.e. "a supporting bone, an opposing bone". Thus claims 3-5, 8, 16, 19, 28 and 46-49 include a human within their scope and are non-statutory.

A claim directed to or including within its scope a human is not considered to be patentable subject matter under 35 U.S.C. 101. The grant of a limited, but exclusive property right in a human being is prohibited by the Constitution. In re Wakefield, 422 F.2d 897, 164 USPQ 636 (CCPA 1970).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, 8 and 46-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Wall (U.S. Patent No. 4,502,161).

Wall discloses device comprising and knee implant (14) providing a first major surface positioned upon and congruent with a tibial surface of the knee and a second major surface positioned against a femoral condyle of the knee (see Fig. 6), wherein the second major surface is provided with a femoral glide path. The implant further comprises one or more tibial projections (22) extending distally over a rim of the posterior tibial plateau and proceeding in a mesial direction. The implant further comprises at least one ancillary component (26) integrated into the implant to provide fixation into bone. The components used for securing the implant to the knee are screws (28). Wall also discloses the implant being made of Dacron and Stainless steel (Col. 3, lines 52-68).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 16, 19 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wall (U.S. Patent No. 4,502,161).

Averill et al. disclose the claimed invention except for the dimensions of the preformed component or the glide path as set forth in claims 3, 9, 19 and 28. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the dimensions of the preformed component and the glide path of claims 3, 9, 19 and 28, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-5, 8, 9, 16, 19, 28 and 46-49 have been considered but are moot in view of the new ground(s) of rejection.

Furthermore, the current condition of these claims are directed towards non-statutory subject matter which is why there is no double patent rejection in this office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for art cited of interest.
